

AgroMax™ LED RAW 65

65 WATT FULL SPECTRUM
LED GROW LIGHT

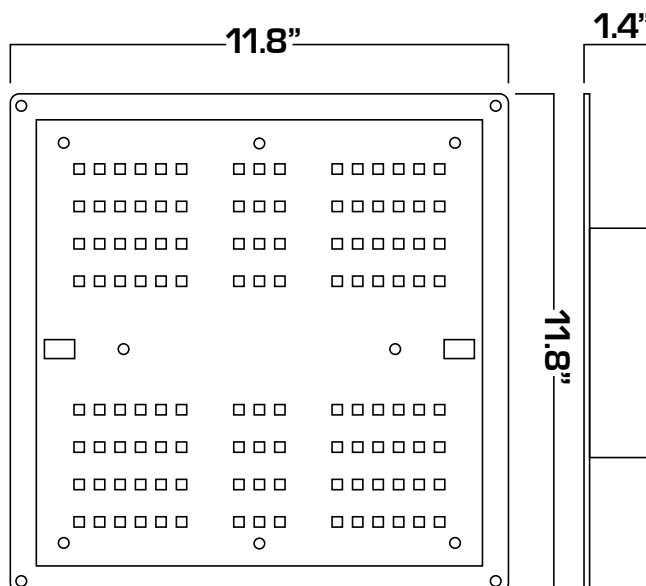

The AgroMax RAW 65 delivers high-end horticultural LED lighting and incredible value. Its Samsung LM301B LED chips and Meanwell driver produce an impressive 2.33 micromole/watt full-spectrum output, while its sturdy aluminum heat sink and dust/water-resistant conformal coating protect components and improve efficiency. This combination of performance and versatility make the AgroMax RAW 65 an ideal LED lighting solution for a wide range of cultivation applications, from seed starting, cloning, and early vegetative growth, to full-cycle small-plant growth and supplemental lighting.

Features:

- Next Generation SMD LED Technology
- Samsung LED LM301B chips with Meanwell driver
- Ultra-efficient 2.33 micromoles (μmol) per watt
- 10,920 lumen output
- 4000K Full-Spectrum White
- Conformal Coating
- Aluminum Heat Sink

Specs List:

- Power: 65w
- Voltage: 90 VAC – 264 VAC
- LED: (120) Samsung LM301B Chips
- Veg Footprint: up to 2'x2'
- Flower Footprint: up to 1.5' x 1.5'
- System Efficiency: 168 lumens per watt
- PPFD Efficiency: 2.33 micromoles (μmol) per watt
- Total Output: 151 micromoles (μmol)
- Dimensions: 11.8" x 11.8" x 1.4" (300mm x 300mm x 36.5mm)
