SAFETY MEASURES & PRECAUTION

This LED fixture is powered with electricity (110V - 277V)! To prevent injury, we ask you to desist from improper use. Never open the driver housing. Health hazards await the consumer and the warranty of the fixture will be voided. Do not use the LED fixture vertically or upside-down. Direct eye contact and long exposure over time may cause permanent damage to your eyesight! This LED fixture was exclusively designed and developed for plant breeding and cultivation. For protection, please ensure that the LED fixture is being operated out of sight and out of reach of children and animals!
